OBJECTIVE

Computer Science undergraduate and UI/UX designer seeking a UI/UX Design internship to apply research-driven, Figma-based design skills to real product problems. Experienced in end-to-end design across three self-directed case studies spanning web dashboards, mobile booking flows, and e-commerce, with a technical foundation (HTML, CSS) that supports close collaboration with engineering teams.

SKILLS

UX: User Research, User Flows, Wireframing, Prototyping, Usability Testing, Information Architecture, Interaction Design, Heuristic Evaluation, User Personas, Journey Mapping

UI: Visual Design, Dashboard Design, Design Systems, Responsive Design

Tools: Figma, FigJam, Canva, Notion

Technical: HTML, CSS

Collaborative: Stakeholder Communication, Cross-Functional Collaboration, Competitor Analysis

PROJECTS

Academic Project Submission System *Web Platform · Role-Based Dashboards*

- Designed a role-based academic workflow platform after identifying that students, faculty, and admins lacked a centralized way to submit, evaluate, and track project progress, causing disorganized communication and delayed feedback.
- Mapped distinct needs across 3 user personas (Student, Faculty, Admin) through research, then structured tailored dashboards and navigation for each role to reduce task confusion and streamline handoffs.
- Built a reusable design system in Figma spanning all dashboard screens to keep UI patterns consistent and speed up future screen additions.
- Delivered user flows, wireframes, and information architecture that gave stakeholders a clear, testable model of the full submission-to-evaluation lifecycle.

Rental Property Finder *Mobile App · Search & Booking*

- Designed a rental search and booking app end-to-end after research surfaced that cluttered listings and unclear booking steps were the biggest barriers to property discovery.
- Created user flows and wireframes across 4 core screens (search, listing, booking, and property detail), simplifying the path from browsing to confirmed booking.
- Iterated the high-fidelity prototype based on usability-focused interaction patterns, improving clarity around filters, availability, and next steps at each stage.

The Luxe Fashion App *Mobile App · E-Commerce*

- Redesigned a luxury fashion shopping experience after competitor analysis revealed weak visual hierarchy was hurting product discoverability across similar apps.
- Reworked layout structure, typography, and spacing to reinforce a premium brand feel while keeping product browsing scannable.
- Delivered high-fidelity screens with an improved shopping workflow, making key actions (browse, filter, checkout) easier to find and complete.

EDUCATION

Centurion University of Technology and Management | Visakhapatnam, India

Bachelor of Computer Science | 2023 – 2027

CERTIFICATIONS

- Foundations of User Experience (UX) Design — Google (Dec 2025)
- Start the UX Design Process: Empathize, Define, and Ideate — Google (Dec 2025)
